Cloud AWS

Work Experience

HeyBassh

Nov 2024 – Present

Full Stack Developer

Key Responsibilities

- Architected and developed end-to-end solutions using modern full-stack technologies.
- Built and customized HubSpot modules and templates, leveraging its database for dynamic content management.
- Optimized workflows by implementing efficient data-handling strategies.
- Designed RESTful APIs and integrated them with dynamic front-end applications.
- Implemented responsive UI designs with React.js and Angular for enhanced user experiences.
- Managed backend services using Node.js and Spring Boot depending on project needs.
- Led the migration of legacy systems to microservices-based architecture, improving scalability and maintainability.
- Integrated third-party services and APIs to extend application functionality.
- Collaborated with cross-functional teams to deliver projects on time using Agile methodologies.
- Mentored developers doing apprenticeship and conducted code reviews to maintain quality standards.

Freelance Web Developer

May 2023 – Oct 2024

Independent Contractor

Key Responsibilities

- Developed custom websites and web applications for various clients using Node.js, FireBase, JavaScript, and React.
- Built responsive designs and ensured cross-browser compatibility.
- Integrated e-commerce solutions, content management systems, and custom plugins.
- Optimized websites for performance, SEO, and accessibility.
- Provided ongoing support and maintenance, including updates and troubleshooting.

Projects

Offcampus Rooms

April 2024 – Present

- Developed a dynamic platform connecting off-campus housing students (mostly students) with available rooms.
- Implemented robust search functionality, booking systems, and secure payment integration.
- Utilized modern web frameworks and cloud services to ensure scalability and reliability.
- Integrated real-time notifications and user authentication mechanisms.
